U01L04 – Add Color to Text

Student Guide

What You're Doing

In this lesson, you will improve a Minecraft chat story you already wrote by adding color to your text. Color helps make messages clearer, more expressive, and more interesting to read.

You will **borrow color ideas**, plan your choices, and then update your existing code.

Step-by-Step Workflow

Step 1: Explore Colors

Run the Color Demo project provided by your teacher.
Observe how different colors look in Minecraft chat.

✅ Do **not** copy code from the demo.
✅ Decide which colors you like and why.

Step 2: Plan Before You Code

Before editing your program, choose which color will go on each line of your story.

Use the planning section below to write down:

- Your story line
- The color code you will use

✅ This planning step is required.

Step 3: Edit Your Story Code

Open your original story project.

For each line:

- Copy **only the section code** (example: §6)
- Paste it **inside the quotation marks**
- Place it at the **very beginning** of the line

Run your code after each change to check your work.

Step 4: Final Check

When finished:

- Your original story should still be there
- Color should improve readability or emphasis
- Your code should run with no errors

Color Reference

Part A: What Minecraft Colors Look Like

§ is called a section sign. Do not try to type it yourself. Copy it.

§0: Black text
§1: Blue text
§2: Green text
§3: Aqua text
§4: Dark red text
§5: Dark purple text
§6: Gold text
§7: Gray text
§8: Dark gray text
§9: Dark blue text
§a: Green text
§b: Light blue text
§c: Red text
§d: Purple text
§e: Yellow text
§f: White text

Optional Reflection (If Assigned)

- Which line is most important in your story?
- How can color help that line stand out?

Part B: Section Code Bank

Copy ONLY the symbol you need

§0 §1 §2 §3 §4 §5 §6 §7 §8 §9 §a §b §c §d §e §f

🚫 Do not copy full lines of code
✅ Copy only the section code

Plan Your Story Colors (Do This First)

Line 1 text: _____

Color code I will use: _____

Line 2 text: _____

Color code I will use: _____

Line 3 text: _____

Color code I will use: _____

Line 4 text: _____

Color code I will use: _____

Line 5 text: _____

Color code I will use: _____

Line 6 text: _____

Color code I will use: _____

How This Assignment Is Graded (Student View)

- **2 points** – You edited your *previous* code (not a new project)
- **2 points** – You planned your color choices before coding
- **3 points** – You used at least **three different colors**
- **1 point** – Color was used to emphasize important text

✅ Total: **8 points**
