Say Hello World in Python

Write and run your first Python program that makes your player speak.

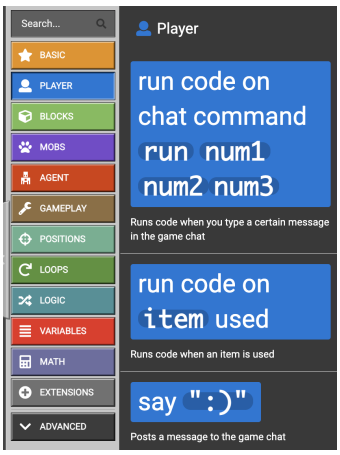
Create Your First Python Program

1. Press **C** to open MakeCode
2. Add two lines at the top:
   # Your Name
   # Your Project Information

```
1 # Your Name
2 # My First Project
```

Create Your Command

1. Drag player.say() from the Player drawer
2. Replace the smiley face with:
   "Hello World"
3. Check your code:
   - player.say is lowercase
   - There is a dot between player and say
   - Your message is inside quotes



Run & Debug

1. Click the Play button
2. Look for your message on screen
   - Top-left corner
   - Press **F3** if needed
3. If it doesn't work:
   - Re-check your code
   - Try again
   - Ask for help

⭐ **Try this:** Add another player.say command with your own message.
